Professional Summary

Solution Architect / Senior Software Engineer / Technical Lead with 13+ years of experience designing and delivering web, mobile, and cloud platforms. Strong background in system architecture, technical leadership, CI/CD, platform engineering, and scalable business applications. Experienced in translating business and operational requirements into practical technical solutions, leading cross-functional delivery, and improving engineering effectiveness through automation, repository-native AI guidance, and reusable AI-assisted development workflows.

Core Strengths

- Solution architecture and system design
- Technical leadership and scrum delivery
- Full-stack and mobile engineering
- CI/CD and platform automation
- Cloud and distributed systems
- API and system integration
- Scalable and maintainable business systems
- Cross-functional communication and execution
- AI-assisted engineering workflows
- Developer productivity automation

Technical Skills

Backend

C#, Java, Node.js, Python, Go

Frontend

Angular, React, JavaScript

Mobile

Flutter, Android SDK, Ionic

Databases / Data Platforms

MS SQL, Oracle, MongoDB, Elasticsearch, InfluxDB, Redis

Cloud / Platform / DevOps

AWS, Azure, GitLab, Kubernetes, Helm, Terraform

AI Engineering / Developer Productivity

Repository-native AI guidance, reusable agent workflows, custom instructions, structured task execution, prompt/spec engineering, AI workflow evaluation

Machine Learning / AI Exposure

TensorFlow, NVIDIA NeMo, Kubeflow, OpenCV, Darknet YOLO

Professional Experience

Certis Cisco, Singapore

Frontend Lead & Technical Consultant

Jan 2022 – Present

- Lead frontend and cross-functional technical delivery for cloud platform services and a workforce operations management platform, working across Angular, Flutter, Java, Kotlin, and C#.
- Designed and implemented CI/CD pipelines on AWS and Azure using GitLab, Kubernetes, Helm, and Terraform to improve deployment automation, scalability, and development workflow efficiency.
- Provided technical leadership in frontend architecture, implementation planning, and scrum-based execution to align delivery with platform and business needs.
- Designed repository-native AI guidance and reusable agent workflows to support engineering tasks such as implementation, validation, and documentation.
- Applied AI-assisted development practices to improve consistency, reduce ambiguity, and accelerate day-to-day software delivery while preserving project-specific conventions and guardrails.

Certis Cisco, Singapore

Solutions Architect

Mar 2019 – Jan 2022

- Designed cloud solutions for workforce operations using IoT, robotics, machine learning, backend services, and mobile applications across Node.js, Python, Go, Angular, React, MongoDB, MQTT, ROS, Flutter, and Android SDK.
- Built CI/CD pipelines and supported server clustering and platform automation using Kubernetes, Helm, and Terraform to improve deployment reliability and operational scalability.
- Participated in AIOps pipeline design and development using Kubeflow on Kubernetes together with tools and frameworks such as OpenCV and Darknet YOLO.
- Worked across architecture, implementation, and platform delivery to translate emerging technical capabilities into practical business solutions.
- Explored and applied AI/ML-enabled workflow design in operational platforms, helping bridge architecture decisions with practical implementation and delivery needs.

Timecruiser Computing Corp., Taiwan

Senior Backend Developer & Tech Lead*Oct 2014 – Dec 2018*

- Built B2B cloud services for higher education in the U.S. and enterprise training platforms in China using microservices architecture.
- Supported workloads serving 10K+ concurrent users with less than 0.1% downtime across three data centers in the U.S., Taiwan, and China.
- Led development activities in scrum-based teams and contributed to architecture, backend services, and platform reliability.

Mitake Information Corp., Taiwan

Software Engineer*Nov 2011 – Oct 2014*

- Contributed to Android mobile apps in the financial domain, including a stock trading app with over 1 million active users and more than 80% market share among brokers.
- Worked on core software architecture and native Android application development in a large-scale production environment.

Galaxy Software Service Corp., Taiwan

Program Analysis*Aug 2010 – Sep 2011*

- Contributed to product development and maintenance for knowledge management systems, web services, and mobile applications.
- Worked primarily with C#, MS SQL, Elasticsearch, and IIS.

Muchtel Technology Inc., Taiwan

Software Engineer*Mar 2009 – Aug 2010*

- Built mobile applications, web backend services, and management platforms for a digital marketplace / app store service.
- Integrated payment workflows with PayPal and telecom billing systems.

Education

Huafan University, New Taipei City, Taiwan

Bachelor, Management Information Systems*2003 – 2007*
